

Audi Rescue Cards

Model Overview

Legal Disclaimer: This manual has been created exclusively for rescuers who have been specially trained in the area of providing emergency rescue after automobile accidents and who are therefore qualified to use the activities described in this manual. Furthermore, this manual shows the maximum possible equipment specification in the model overview. Vehicle specifications and special options as well as Audi model availability are constantly subject to change. Therefore, Audi reserves the right to change the content of this manual at all times.

Please note: The information contained in this manual is not intended for customers or

for repair shops and dealers. Customers may gather detailed information from their vehicle owner's manual regarding vehicle function as well as any occupant safety features and system descriptions. Repair shops and dealers obtain repair information through their normal channels.

Hint: The maximum possible equipment specification is always shown in the model overview.

You will find information about rescue and recovery involving Audi vehicles in the Audi Rescue guide lines.

Download: To download the rescue cards just click on the model you are looking for. The download starts automatically.

▶ Audi A1 e-tron

from 2011

Identifying feature

The Audi A1 e-tron can be identified by means of the „e-tron“ logo on the instrument cluster or on the wing.

Instrument cluster

Wing

Hints

⚠ In the case of accidents in which the airbags are deployed, the high-voltage system is deactivated. If the vehicle is connected to the charging point/socket, the charging cable is to be disconnected.

In the case of accidents with deployed/undeployed airbags

- ▶ Place Vehicle in Park and set parking brake
- ▶ Switch off the ignition
- ▶ Disconnect the negative terminal of the 12V battery

⚠ The electric motor is silent!

It may not be possible to detect that the car is ready to go by the noises it makes when in operation, as the electric motor is silent. If the large needle in the dial on the left of the instrument cluster (power metre) is not on „OFF“ (for example on the „READY“ position), you have to expect that the electric motor may run or the internal combustion engine may start automatically.

Identification of the high-voltage components

Identification of the high-voltage battery

Identification of the high-voltage battery is located underneath the vehicle, below the transmission tunnel and the rear seat.

It is a lithium-ion battery.

Identification of the remaining high-voltage components

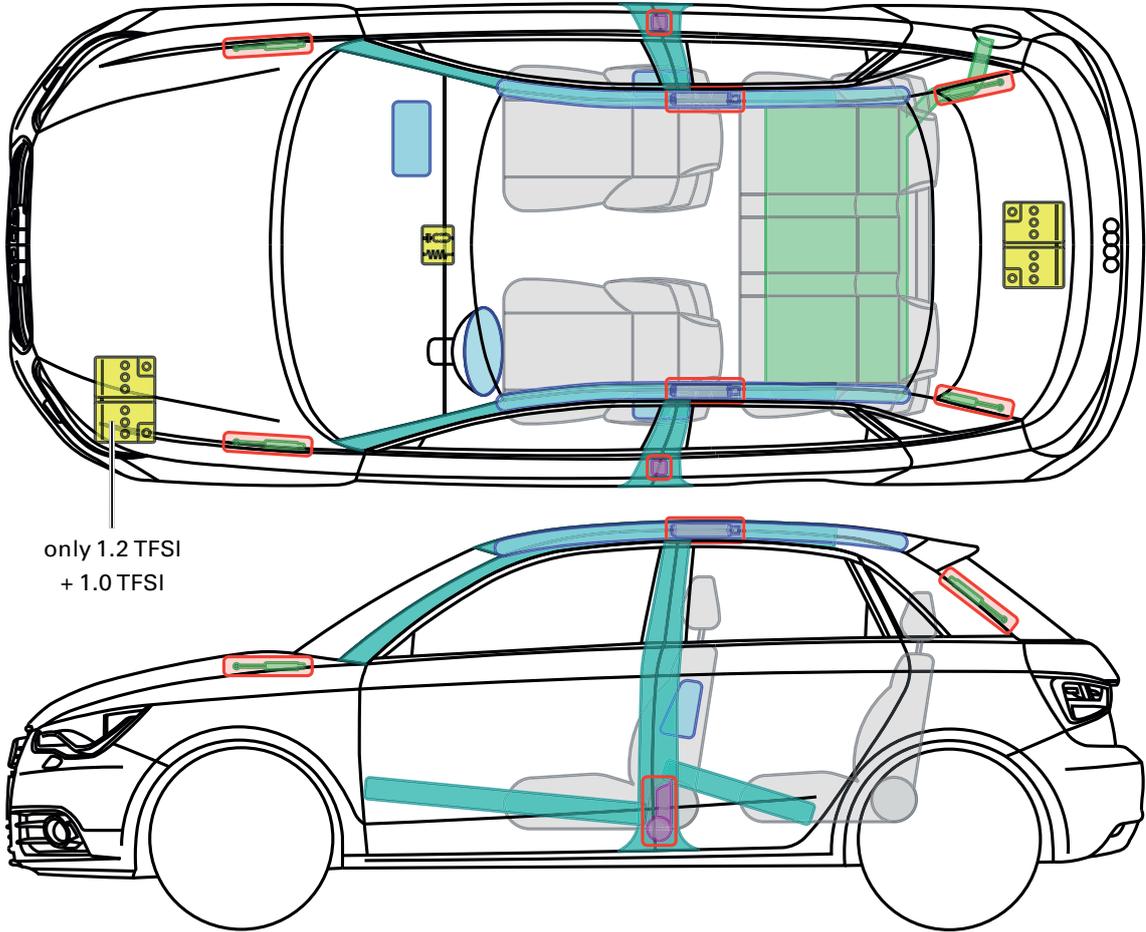

All the high-voltage leads and the high-voltage connections are provided with orange insulation. These items must not be disconnected or damaged.

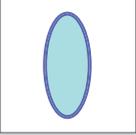

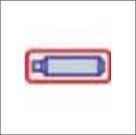

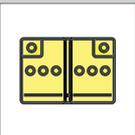

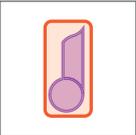

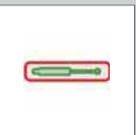

▶ Audi A1 / S1 Sportback

from 2012

only 1.2 TFSI
+ 1.0 TFSI

Legend

	Airbag		Reinforcement		Control module
	Gas generator		Rollover protection		Battery
	Pre-tensioner		Gas-pressure damper		Fuel tank

This document is a subject to the copyright of AUDI AG, Ingolstadt. Any duplication, distribution, storage, communication, broadcast and reproduction or transmission of the contents without written approval from AUDI AG is prohibited.

▶ Audi A3 Sportback g-tron

from 2013

Shut off gas tank manually

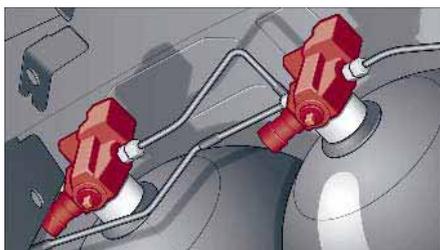

(e. g. in the case of smell of gas or leaking natural gas)

1. Access to natural gas tanks

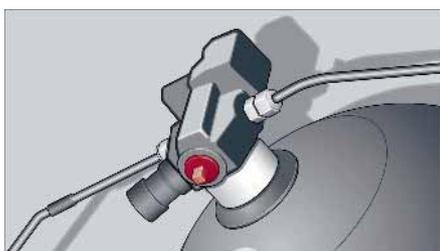

- ▶ Gas tanks are accessible from underbody.
- ▶ Gas tanks are protected by a plastic cover. In order to access the gas tanks, the cover needs to be removed without damaging the components of the gas system located below.

2. Locate safety valves

- ▶ Each gas tank is equipped with its individual cylinder valve and manual stopcock.

3. Switch off gas tank manually

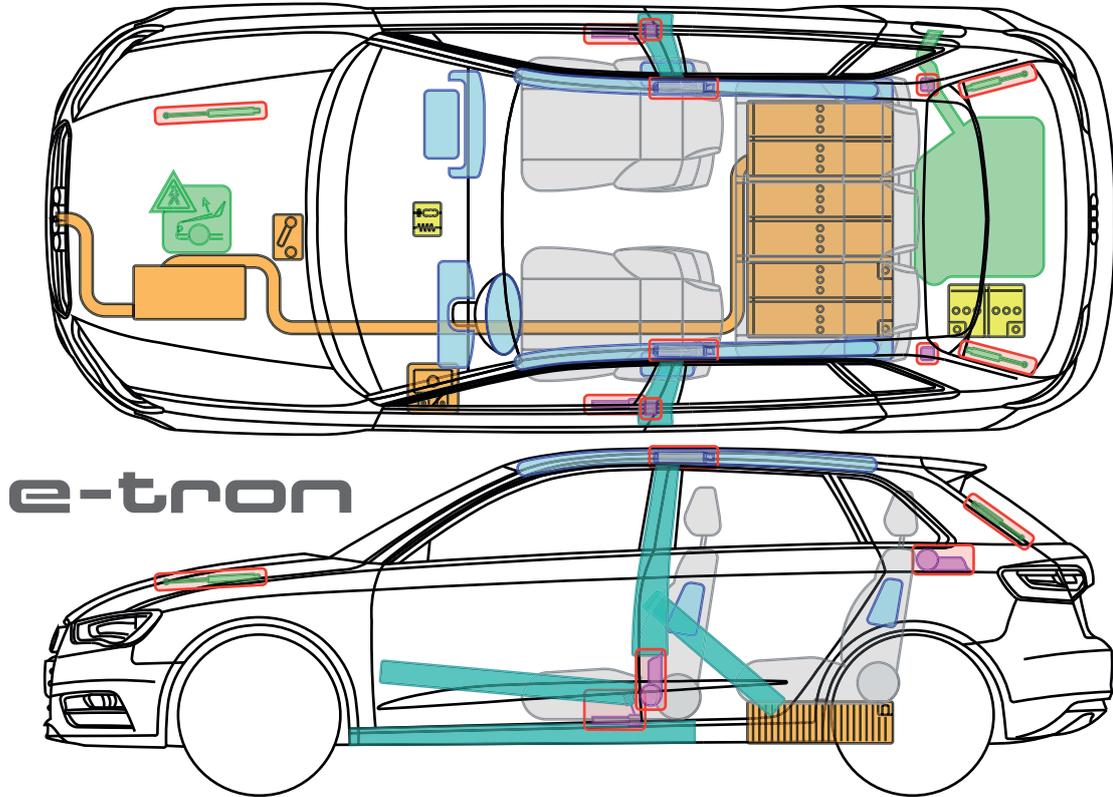

- ▶ If required, each fuel tank must allow separate shut-off.
- ▶ By means of a 5 mm open-end wrench or ring spanner the manual shut-off valve may be shut off by means of turning the square clockwise until reaching the stop of the valve.

▶ Audi A3 Sportback e-tron

from 2014

Legend

	Airbag		Overall protection		Fuel tank		High-voltage emergency disconnect
	Gas generator		Gas-pressure damper		High-voltage battery		Pedestrian protection system
	Pretensioner		Control module		High-voltage leads/components		
	Reinforcement		12 V battery		High-voltage emergency disconnect fuse		

This document is a subject to the copyright of AUDI AG, Ingolstadt. Any duplication, distribution, storage, communication, broadcast and reproduction or transmission of the contents without written approval from AUDI AG is prohibited.

Audi A3 Sportback e-tron

from 2014

Characteristic features

The A3 e-tron can be identified by the e-tron logo, the orange cables (e. g. in engine compartment) and the charging socket.

e-tron

Vehicle immobilization

1. Gear lever in position park „P“
2. Apply parking brake

Switch off ignition

Press START-ENGINE-STOP button **without** depressing brake pedal.

Warning: When pressing the START-ENGINE-STOP button and depressing the brake pedal at the same time, the engine will start!

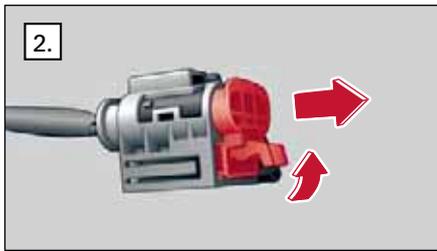

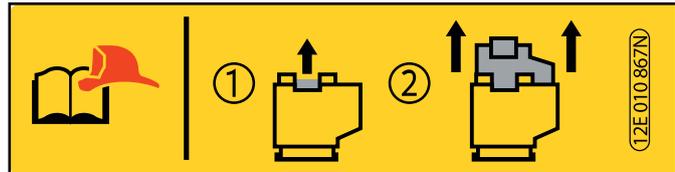

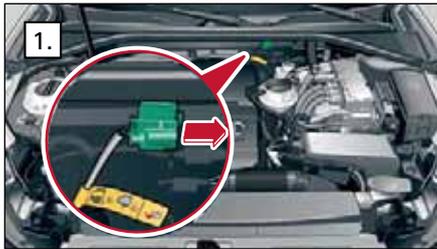

Audi A3 Sportback e-tron

from 2014

Deactivation of High Voltage System

Alternative 1 – Engine compartment accessible

1. Localize emergency disconnect
2. Open safety disconnect

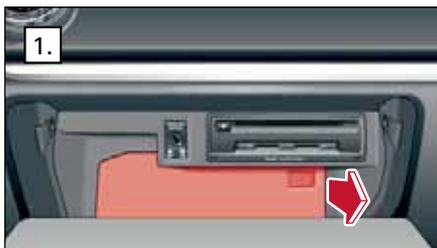

Alternative 2 – Emergency disconnect fuse in passenger compartment

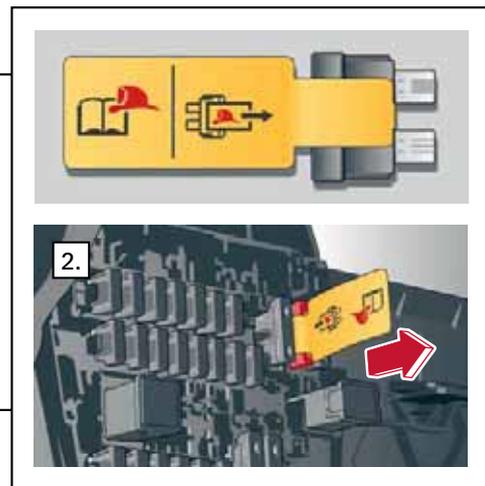

1. Identify emergency fuse
2. Disconnect emergency fuse

Fuse box – **left-hand drive** (steering wheel left)

Fuse box in glove compartment **right-hand drive** (steering wheel right)

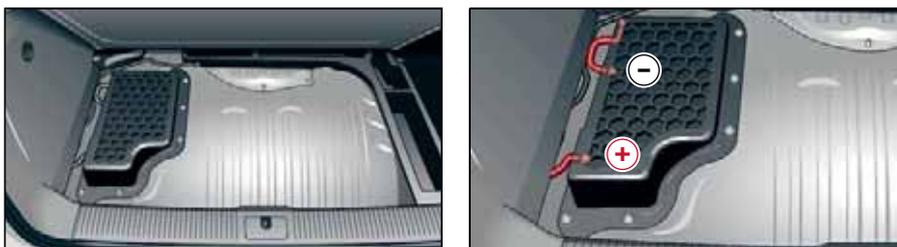

▶ Audi A3 Sportback e-tron

from 2014

Disconnect 12 V battery

The 12 V battery is located in the luggage compartment below the luggage compartment floor. The cables of both terminals are fed out directly through the plastic cover.

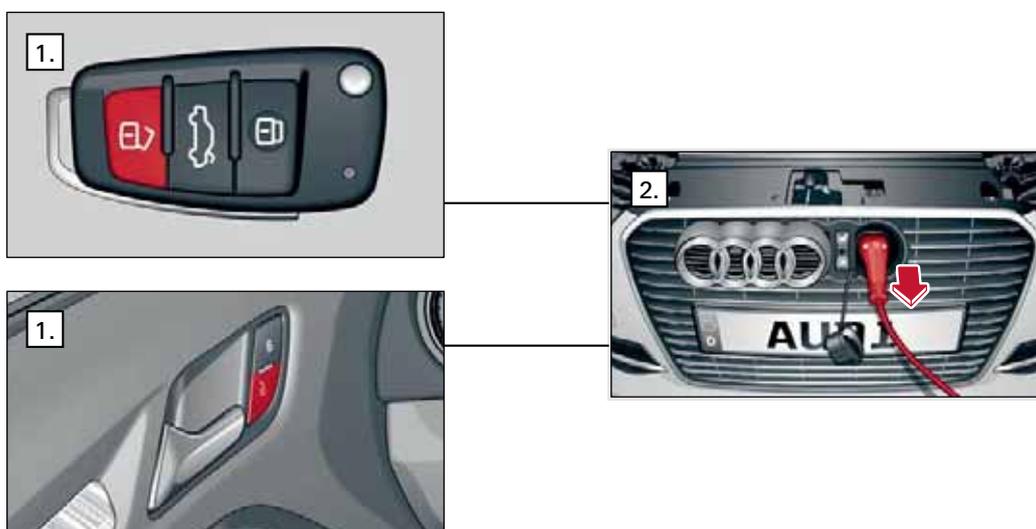

Disconnect charging cable

Vehicle connected to charging station:

1. Unlock vehicle via remote control or central locking switch
2. Disconnect charging cable

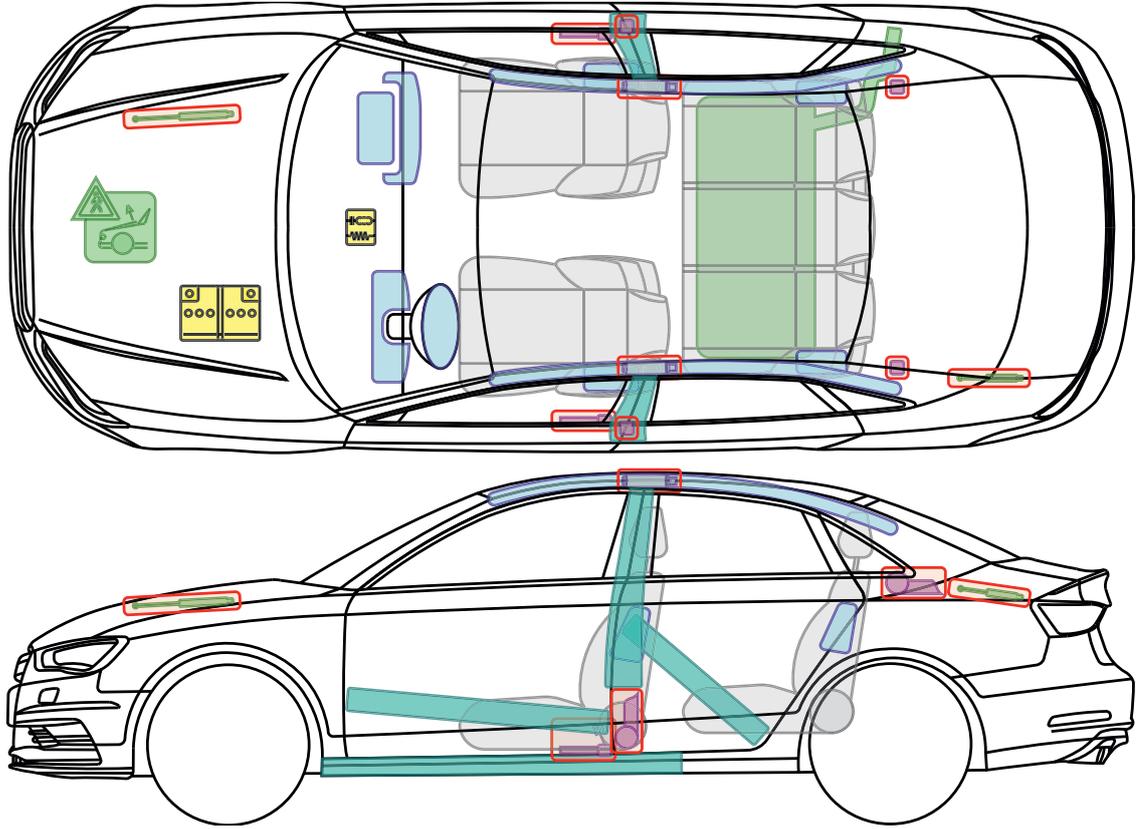

If required, follow further steps of this rescue data sheet

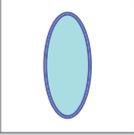

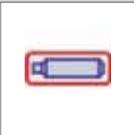

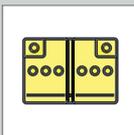

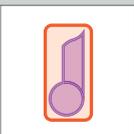

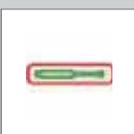

▶ Audi A3 / S3 Limousine

from 2013

Audi A6 hybrid

from 2012

Identifying feature

The Audi A6 hybrid can be identified by means of the „hybrid“ logo and the orange cables in the engine compartment.

Hints

⚠ In the case of accidents in which the airbags are deployed, the high-voltage system is deactivated.

In the case of accidents with deployed/undeployed airbags

- ▶ Place Vehicle in Park and set parking brake
- ▶ Switch off the ignition
- ▶ Disconnect the negative terminals of the 12V battery

⚠ The electric motor is silent!

It may not be possible to detect that the car is ready to go by the noises it makes when in operation, as the electric motor is silent. If the large needle in the dial on the left of the instrument cluster (power metre) is not on „OFF“ (for example on the „READY position), you have to expect that the electric motor may run or the internal combustion engine may start automatically.

Switch off the ignition

With the ignition switched on:

Press START ENGINE STOP button without depressing brake pedal.

⚠ Risk of Injury: By pressing the START ENGINE STOP button with depressing brake pedal, the engine starts!

▶ Audi A6 hybrid

from 2012

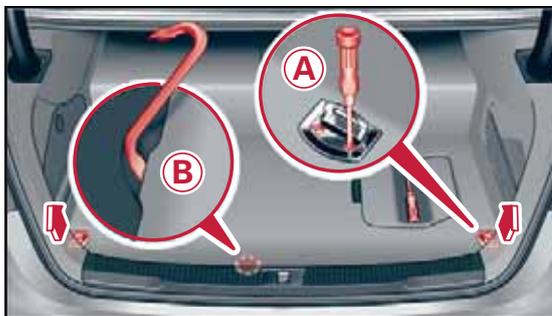

Disconnect the negative terminals of the 12V batteries

Option A:

Release the luggage compartment floor by means of the screws indicated by the arrows (screwdriver in the car tool kit) Disconnect the ground cables from both 12V batteries (picture on right)

Option B:

Lever up the luggage compartment floor by inserting a crowbar at the point indicated. Lift up the luggage compartment floor. Disconnect the ground cables from both 12V batteries (picture on right)

Identification of the high-voltage components

Identification of the high-voltage battery

Identification of the The high-voltage battery is located under the luggage compartment floor.

It is a lithium-ion battery.

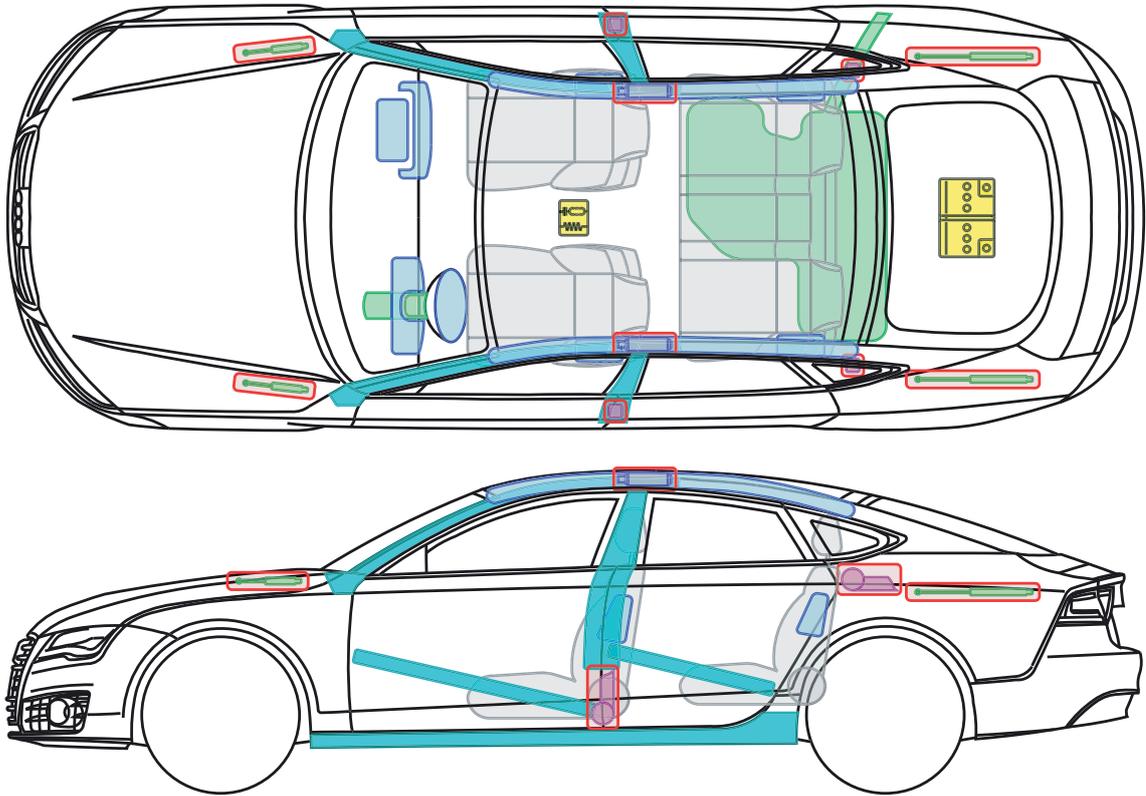

Identification of the remaining high-voltage components

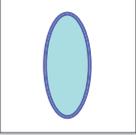

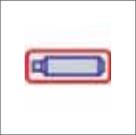

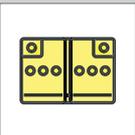

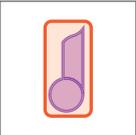

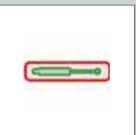

All the high-voltage leads and the high-voltage connections are provided with orange insulation. These items must not be disconnected or damaged.
